LIST OF D. P. W. SUBJECTS.

BANGALORE DISTRICT.

Subject and speaker.	Summary of discussion.	Reply of Govt.
Subject No. 400 Construction of an ane across Hebbahalla Mr. Subbaiya of Channapatna Taluk.	At the last year's meeting the question of constructing an *ane* across Hebbahalla above Nagavara, Mogenhalli and Harur tanks was referred to the Public Works Department but no action has as yet been taken by that department in the matter.	The Public Works Department will be asked to expedite the investigation of this project.
Subject No. 401 Construction of a tank across Vrishabhavati river near Bairamangala. Mr. Krishnappa of Closepet Sub-Taluk.	The construction of a tank across the Vrisliabhavati river near Bairamangala may be taken up and completed soon. It will bring about 5,000 acres of land under wet cultivation.	Referred to Public Works Department
Subject No. 402 Construction of a tank near Bannikuppe. Mr. Krishnappa of Closepet Sub-Taluk.	A tank may be constructed near Bannikuppe in the Kangal Hobli. The site of the proposed tank has been inspected by the Public Works Department. The tank, if constructed, would bring about 1,000 acres of land under cultivation besides being useful for men and cattle of eight or ten villages.	Referred to Public Works Department for investigation.
Subject No. 403 Water-supply to the Closepet Town. Mr. Varadachar of Closepet Municipality.	Water is supplied to the town of Closepet by means of pipes laid at a cost of about Rs. 13,000. The taps are at a depth of 4 to 7 feet and it is very difficult for people to get down to that depth and bring water. Moreover pipes are not laid in suitable places. It is a matter for consideration whether arrangements cannot be made to pump up water by means of an engine, the price thereof being paid by the Municipalities of Closepet and Channapatna, both of which could be supplied with water in this way. The cost of working the engine may be met from a water-tax.	All that is possible is being done. The question whether any further expansion or improvement is feasible will be investigated by the Sanitary Engineer.
Subject No. 404 Water-supply to the town of Dodballapur. Mr. Puttanna of Dodballapur Taluk.	There are about 1,500 houses in the town of Dodballapur with a population of 8,000. The wells therein are very few and the supply of water is limited. Arrangements may be made to supply the town with water from Sivapur tank which is at a distance of two miles from the town.	This will be investigated.
